RE: ISO INFORMATION REQUEST - AZ - AVRA VALLEY FD - PINA/ PIMA Co. - NEW STATION

Good Morning Chief Delfs,

Thanks for your question. ISO is aware of the new station and we have already input this data into our system workflow. The effective date for this data to be returned in our systems takes several months. It is 7/1/15 when the insurance industry will see this new station. We have several databases and mapping roadbases that need to be updated. The cycles in which they are updated results in future effective dates.

As ISO receives cases from the insurance companies for this area, they are being told that ISO is aware of the new station and the effective date is 7/1/15 and that PPC 3/3Y(3/8B) will be returned at that time. Thank you for your cooperation and understanding.

Thank you for your help, cooperation and continued support.
